VOLUME
I
NUMBER
I
1911

The dark field spotlights the slender, nimble undulating form of *Treponema pallidum* to establish a diagnosis of syphilis. The prognosis may be dark if the patient fails to receive adequate therapy.

MAPHARSEN is a dependable arsenical, with years of clinical experience and millions of administered doses testifying to its effectiveness.

MAPHARSEN is one of a long line of Parke-Davis preparations whose service to the profession created a dependable symbol of significance in medical therapeutics—
MEDICAMENTA VERA.

MAPHARSEN (Oxophenarsine Hydrochloride)
in single dose ampoules of 0.04 gm. and
0.06 gm.; boxes of 10 ampoules. Multiple dose,
hospital size ampoules of 0.6 gm., in boxes of 10.

OPPORTUNITIES AVAILABLE

AZNOE'S, established 1896, has available a splendid group of well trained Physicians for appointments. Many desire assistantships; others are specialists qualified to head departments. We also place Nurses, Dietitians, Laboratory, X-ray and Physiotherapy Technicians. For biographies, please write Ann Woodward, Director, Aznoe's-Woodward Medical Personnel Bureau, 185 N. Wabash Ave., Chicago.

WANTED—(a) Pediatrician, obstetrician-gynecologist, internist and, also, general surgeon for posts of chiefs of department, fairly large hospital; full-time; Diplomates required; salaries dependent upon qualifications, minimum, however, \$12,000; West. (b) Orthopedic surgeon, Diplomate, to become associated with Diplomate long established in California; excellent connections. (c) Young internist, qualified in gastro-enterology, for position of assistant internist; clinic conducted under American auspices; Latin America. (d) Associate in radiology by radiologist, Diplomate, for busy hospital and office practice; California; \$10,000. (e) Pediatrician, Diplomate of American Board, for chief of department of fairly large clinic; outstanding man required; \$15,000, possibility of early percentage arrangement increasing income to \$18,000; West. (f) Otolaryngologist to head department, one of the most successful groups on the Pacific Coast; Diplomate not over 45 required. Write M. Burneice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

PHYSICIANS WANTED—EENT specialist to associate with established doctor or young man to assist and receive training this specialty. Excellent financial arrangements. **GENERAL PRACTITIONER** with minimum one year private practice for office industrial and administrative job. Under 45 years. Southern California. **INTERNIST** interested some psychiatry for association with clinic-hospital. \$500.00. Home available. **OPHTHALMOLOGIST**, preferably certified and able to relieve occasional otolaryngology for association northern California group. Partnership opportunity within a year. **RADIOLOGIST**, must be certified. California hospital. **GENERAL PRACTITIONER** to associate with elderly well established physician, central California. Take over practice at early date. Write, Hedwig Falkell, Director, Pacific Coast Medical Bureau Agency, Inc., 1406 Central Tower, San Francisco 3.

SAN DIEGO COUNTY ACCEPTING APPLICATIONS FOR: HOSPITAL SUPERINTENDENT—900 bed general hospital with student nurse, interne, and residency programs; medical and administrative experience required; \$749 to \$909 a month. **CHIEF PREVENTIVE MEDICAL SERVICES**—Health Dept., public health experience required; \$559 a month. **PHYSICIAN (TUBERCULOSIS)**—2 years experience, \$532 a month; 1 year experience, \$483 a month or \$15 per clinic. **PHYSICIAN (VENEREAL DISEASE)**—1 year experience, \$483 a month or \$15 per clinic. Applications and information at Room 212, Civic Center, San Diego.

RESIDENT PHYSICIAN for private sanitarium and clinic near Los Angeles. Internal medicine and some experience in N. P. work desirable. Excellent opportunity for qualified, energetic, ambitious gentle. Salary open. Furnished residence on grounds. State full particulars regarding experience, training, religion and salary expected. Also furnish recent photograph. Box 12,000, California Medicine.

HOMEOPATHIC PRACTICE—Splendid opportunity for qualified Homeopathic Physician to take over old established practice. Excellent field and the need is urgent. Office, equipment, books and medicines. Ready for occupancy. For further details contact Mrs. Freda C. Samson, Box 417, Marysville, California.

PATHOLOGIST wants Junior Partner leading to full partnership. Located in western city over 14 years. Over 24 years experience. Diplomate or one eligible for Board required. Excellent opportunity both financially and professionally. For details reply to Box 12,040, California Medicine.

BEVERLY HILLS, California Physicians office. Built in files and instrument cabinets. Beautifully furnished extra large reception room with receptionist. Beverly Hills Professional Building. Unusually good transportation. Approximately 1,000 square feet partitioned, and will nicely accommodate two physicians. Complete X-Ray and Laboratory in building. Write W. E. Schwartz, D.D.S., 105 N. San Vicente Blvd., Beverly Hills.

OPPORTUNITIES WANTED

PEDIATRICIAN—B.A., M.A., M.D. degrees, eastern schools; two-year internship, three years' training in pediatrics during which time he served as instructor of pediatrics; two years' private practice; California license; for further information, please write Burneice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

(Continued on Page 10)

So that you may
prescribe according to
the individual needs
of your patients . . .

5% HYPROTIGEN-C

(Protein Hydrolyzate, Baxter)

. . . provides the essential amino acids *without* dextrose. The physician best knows the nitrogen and carbohydrate needs of each patient. When a protein hydrolyzate is indicated intravenously, 5% Hyprotigen-C can be prescribed accurately and easily—for a gram of Hyprotigen-C is equivalent in nitrogen content to a gram of protein.

When intravenous dextrose is also required, the indicated concentration can be selected precisely from the wide range of Vacoliter dextrose

solutions, and preferably administered prior to the protein hydrolyzate. This satisfies the body's energy needs and reserves the hydrolyzate for required building of tissue and plasma protein.

Thus 5% Hyprotigen-C allows you a therapeutic freedom which we believe is important if medication is to be properly individualized.

Your hospital now has, or can quickly obtain, adequate supplies of 5% Hyprotigen-C in Vacoliter containers.

Comprehensive review of the literature on protein deficiency and its treatment, including a therapeutic discussion of 5% Hyprotigen-C—yours, with our compliments. Write the Laboratories for your copy.

COLLEGE OF MEDICAL EVANGELISTS

Graduate School of Medicine

*Announces the following courses for
Graduate Physicians:*

DIFFERENTIAL DIAGNOSIS AND TREATMENT OF INTERNAL DISEASES (12 periods), Dr. Julius Bauer and Associates.

Course begins January 5, 1948.

Mondays, 8:00-9:30 p.m., Room 6641, Los Angeles County General Hospital.

Tuition, \$50.00.

This course is based upon a discussion of diagnostic and therapeutic problems arising at the bedside. Chief stress is laid upon understanding the basic pathology beyond the customary diagnostic labels.

ENDOCRINOLOGY (8 periods), Dr. Julius Bauer.

Course begins April 5, 1948.

Mondays, 8:00-9:30 p.m., Room 6641, Los Angeles County General Hospital.

Tuition, \$30.00.

This course is designed for the postgraduate student of Internal Medicine as well as the general practitioner. Special emphasis is placed on the practical application of glandular diseases to the every-day problems in medical practice.

NEUROLOGY (8 periods), Dr. Cyril B. Courville and Associates.

Course begins January 8, 1948.

Thursdays, 8:00-9:30 p.m.

Tuition, \$30.00.

Organic lesions of the central and peripheral nervous system will be covered didactically, illustrated by gross specimens, clinics, and blackboard outlines.

FUNCTIONAL NEUROLOGY (8 periods), Dr. J. M. Nielsen.

Course begins February 3, 1948.

Tuesdays, 8:00-9:30 p.m.

Tuition, \$30.00.

The principal psychoneuroses will be presented; also, a brief outline of major psychoses will be given, with essentials of insulin and metrazol treatment.

DERMATOLOGY (10 periods), Drs. Samuel Ayres, Jr., and Clement Counter, and Associates.

Course begins, January 6, 1948.

Tuesdays, 8:00-9:30 p.m.

Tuition, \$40.00.

A general brief discussion will be given of the main dermatologic manifestations and their underlying causes. Lectures illustrated profusely by colored lantern slides.

NUTRITION (20 hours), Michael J. Walsh, M.Sc.

Course begins April 14, 1948.

Wednesdays, 2:00-5:00 p.m.; 7:00-9:00 p.m.

Tuition, \$25.00.

The purpose of this course is to give the practicing physician a thorough foundation in the principles and practice of diet and nutrition.

GENERAL ORTHOPEDIC SURGERY (6 weeks), Dr. Arthur Steindler and Associates.

Course begins February 2, 1948.

Full-time course.

Tuition, \$150.00.

This course is designed as a review course for orthopedic surgeons, and general surgeons who in their communities must care for the patient presenting complaints referable to the skeletal system. The subject material will include applied anatomy, bone pathology, applied kinesiology, and orthopedic surgical technic. Traumatology will also be included to cover fractures and dislocations besides damage to the contents of the three cavities—head, chest and abdomen—as well as peripheral nerve and vascular injuries, essentially the same as course described above.

MINOR ORTHOPEDIC SURGERY (8 periods) Dr. G. Mosser Taylor and Associates.

Course begins March 18, 1948.

Thursdays, 8:00-9:30 p.m.

Tuition, \$30.00.

The purpose of this course is to present various subject matter in which the general practitioner should have working knowledge.

GENERAL UROLOGY (6 periods), Dr. Roger W. Barnes and Associates.

Course begins January 7, 1948.

Wednesdays, 8:00-9:30 p.m.

Tuition, \$25.00.

Major urologic conditions will be considered by didactic lectures, motion pictures, and patient demonstrations.

VARICOSE VEINS (6 periods), Drs. Carl H. Talmage and Alfred E. Gilbert.

Course begins March 4, 1948.

Thursdays, 8:00-9:30 p.m.

Tuition, \$25.00.

This is an intensive course in the modern treatment of varicose veins and ulcers of the leg.

CLASSIFIED ADVERTISEMENTS

(Continued from Page 8)

UROLOGIST—Three years' training in urology and urologic surgery, university hospital; assistantship to Diplomate of American Board of Urology or group association preferred; licensed in California; for further information please write Burneice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

INTERNIST—Diplomate of the American Board; eight years' association in private practice of internal medicine; considerable teaching experience; particularly well trained in cardiology; California license; for further information, please write Burneice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

YOUNG PHYSICIAN is available for an assistantship; preferably one providing training in one of the specialties; A.B., M.D. degrees, University of California; year's rotating internship; three years' military service; licensed in California; for further information, please write Burneice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

SURGEON—Diplomate of the American Board; year's internship and three-year residency in general and orthopedic surgery in one of California's leading hospitals; two-year surgical fellowship, eastern foundation; licensed in California; for further information, please write Burneice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

ORTHOPEDIC SURGEON—Diplomate of the American Board; seven years' military service, where his duties were confined to orthopedic surgical services; licensed in California; for further information, please write Burneice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

FOR SALE

SANITARIUM—Fine location in Mountain View, California. Modern, fully equipped. Beautiful gardens. Licensed for twenty patients. Owner has operated this institution for eight years. Retiring, desires to sell business. Please reply to Box No. 12,010, California Medicine.

CALIFORNIA HOSPITALS FOR SALE—(a) 40 beds, northern California location. Complete equipment and furniture purchased within last three years. Drawing area of 25,000, no other private hospitals within great distance. Minimum down payment and reasonable terms. (b) 28 beds, coast area in growing stable community. Completely equipped. Space for expansion. Excellent location for a surgeon and/or internist. Write for complete details or let us know your interests. We will be glad to find what you are looking for. Hedwig Falkell, Director, Pacific Coast Medical Bureau Agency, Inc., Real Estate Broker, 1406 Central Tower, San Francisco 3.

FOR SALE: Complete x-ray equipment, 500 ma generator, rectifier and control; motor driven tilting Bucky table with fluoroscope and rail-mounted tube stand, impulse timer accurate to 1/120 second; pendulum cassette changer. All Keleket. Price. \$1500. Cost \$6500. Box 11,060, California Medicine.

**A HONEY OF
A TOBACCO!**

*Aromatic
PIPE MIXTURE*

25¢

R. R. TOBIN TOBACCO CO. DETROIT

Outstanding clinical endocrinologists, both here and abroad, have commented on the brighter mental outlook displayed by women receiving "Premarin." Not only does "Premarin" impart a feeling of "well-being" but it offers many other advantages as well.

It is orally active.

It is well tolerated.

It is promptly effective in controlling the menopausal syndrome.

"Premarin" is supplied in three potencies—tablets of 2.5 mg., 1.25 mg. and 0.625 mg. It is also available in liquid form containing 0.625 mg. in each 4 cc. (1 teaspoonful).

While sodium estrone sulfate is the principal estrogen in "Premarin," other equine estrogens . . . estradiol, equilin, equilin, hippulin . . . are also present in varying small amounts, probably as water-soluble sulfates. The water solubility of conjugated estrogens (equine) permits rapid absorption from the gastrointestinal tract.

***controls
cough
quickly
because
it
acts
directly***

*a few inhalations
by mouth
control cough
quickly*

The anesthetic-analgesic vapor* from Eskay's Oralator is delivered by inhalation through the MOUTH directly to the lining of the trachea and larynx—where it acts almost instantaneously to control cough. The patient gets relief in a matter of seconds.

This local therapy produces no appreciable systemic effects, and thus avoids the depressant action of sedatives and narcotics.

Eskay's Oralator is outstandingly convenient—easy to use anywhere at any time. Your patients will appreciate your prescribing this quick-acting oral inhaler. *Smith, Kline & French Laboratories, Philadelphia.*

Eskay's Oralator

A revolutionary advance in the treatment of cough

*(The active ingredient is 2-amino-6-methylheptane, S. K. F.)

best sellers

from STACEY'S

MEDICAL BOOK STORE

AN ATLAS OF THE COMMONER SKIN DISEASES

by Henry C. G. Semon. 139 illustrations, full color plates \$12.00

The demand during the war eliminated the second edition, paving the way for the new edition, all done in Kodachrome. Each plate is accompanied by a page or two of description, pointing to salient features, and a brief discussion of treatment, intended to be neither complete nor final.

COLOR ATLAS OF HEMATOLOGY

by Roy R. Kracke, M.D. \$5.00

This is a quick reference for students and clinicians. There is more diagnosis and interpretation, together with descriptions of diseases and definitions, than would be expected in an atlas. The author, Dean of the Medical College, Alabama, writes from practiced experience; he has a more complete book on hematology, now in its second edition.

PROGRESS IN GYNECOLOGY

by Joe V. Meigs, M.D., and Somers H. Sturgis, M.D., \$7.50

Better than a medical meeting, more easily attained, and in any chosen doses. The authors asked the "hobby" of each of more than seventy authors and put together a refresher course. Like a meeting, it is a little choppy, and there is no golf, but the editors, of Harvard and Massachusetts General, have collected a mass of ideas.

HYPNOTISM TODAY

by Leslie M. Lecron and Jean Bordeaux \$4.00

Two consulting psychologists who are engaged professionally in daily psychotherapeutic work offer a book to physicians and psychologists which—in the words of Dr. Erickson—"presents hypnosis as a worthy, serious field of scientific endeavor. The authors have selected their material well, their exposition of it is excellent, and the presentation of their own studies is unassuming and straightforward."

DISEASES OF THE HEART

by Sir Thomas Lewis, M.D. \$4.50

A renowned book by a famous London cardiologist. The main changes in this revised edition are in the chapters on cardiac failure. It is simple and entirely clinical.

P-Q-R-S-T. A Guide to Electrocardiogram Interpretation

by Joseph E. F. Riseman, M.D. \$3.50

The first edition, published by the author, was a huge success. It is for the beginner and is based on the premise that each portion of the EKG arises from a specific anatomical or physiological area of the heart. Simple, logical, and helpful. The author is Associate in Medicine, Harvard.

NUTRITIONAL AND VITAMIN THERAPY IN GENERAL PRACTICE

by Edgar S. Gordon, M.D. \$5.00

Specific vitamin therapy for scores of disease conditions is given with exact dosage, best methods of administration, definite indications and directions for special techniques of administration, supportive treatment and optimal diet. The author is Associate Professor of Medicine, Wisconsin.

OFFICE ENDOCRINOLOGY

by Robert B. Greenblatt, M.D. \$4.75

An effective time-saver for the average practitioner, who doesn't keep up with rapid advances in the field and is not interested in the polemics of why and wherefore. A refresher and guide, packed with the latest practical and reliable facts on the common endocrine problems. The author is Professor of Endocrinology, University of Georgia.

PYE'S SURGICAL HANDICRAFT. A Manual of Surgical Manipulations, Minor Surgery, and other Matters.

edited by Hamilton Bailey \$7.00

As the New England Journal of Medicine says, "A veritable gold mine of ideas and facts of diagnostic and therapeutic value." It's full of tricks and techniques with good illustrations of both. A look at a copy will convince you. The British author is one of the world's most engaging and authoritative writers in the field of surgery.

COMMON CONTAGIOUS DISEASES

by Philip M. Stimson, M.D. \$4.00

Confined to a dozen diseases, this manual is designed to tell clinicians, especially in pediatrics, what they want most often to know. The language is direct and clinical. The author, Associate Professor of Clinical Pediatrics at Cornell in New York and associated with seven other hospitals, has done quite a bit of revising for the fourth edition.

τ HERE is increasing evidence that, in asthma, gastrointestinal allergies, infantile eczema, migraine, etc., treatment of allergic sensitivities is yielding gratifying results.

To facilitate diagnosis, Arlington offers a specially prepared assortment of 112 diagnostic allergens representing the most commonly reported causative factors... foods, epidermals, fungi and incidentals. Each vial contains sufficient material for at least 30 tests. Full instructions for the simple scratch-test technique and a supply of N/20 NaOH are included.

These dry allergens remain active indefinitely at room temperature. The allergens listed represent the standard Arlington selection. If preferred you may make your own selection of 112 allergens from our current list, available upon request.

NERVOUS DISORDERS

Presenting **NARAKON**

...a distinctive antiseptic nasal decongestant

• **NARAKON*** Solution with Desoxyephedrine has been proved by clinical tests to be safe and effective in achieving nasal antisepsis and decongestion in the therapy of simple inflammatory and allergic rhinologic diseases. • The potent germicidal and tissue-penetrating qualities of **NARAKON** Solution stem from its content of benzalkonium chloride, to destroy common secondary pathogenic invaders of nasal membranes in record time . . . without causing tissue injury or ciliary paralysis.

A small but effective amount (1%) of dl-Desoxyephedrine Hydrochloride aids in promoting mucosal decongestion with virtual freedom from rebound turgescence and systemic action. • Also available as **NARAKON** Plain (without vasoconstrictor) for administration over extended periods as necessary.

• **NARAKON** Solution (Plain or with Desoxyephedrine) is an aromatized, isotonic, aqueous solution, buffered to a suitable pH. It may be administered by atomizer spray, with dropper, as nasal douche, or tamponage. • **NARAKON** Nasal Solution is the first of a distinctive new series of meritorious medicinal agents to be introduced to the profession under the hallmark of "Baybank".

MEAT

And Protein Deficiency

While protein deficiencies per se are difficult to recognize in their incipency, conditions which lead to negative nitrogen balance are well known. The presence of any of the following states which characteristically exert an adverse influence on nitrogen balance, calls for immediate measures to prevent serious protein depletion:

1. Diseases of the digestive organs, which impair proper digestion and absorption.
2. Wasting diseases, infections and thyrotoxicosis, which increase protein breakdown and need far above normal levels.
3. Hemorrhage, burns, and chronic exudative processes, causing excessive loss of protein.

A high protein diet, whenever possible, is considered to be the most effective method of protein administration in the prevention and correction of protein deficiencies.

Meat, which readily is eaten two or more times daily, is an excellent component of the high protein diet. Meat is an outstanding source of protein for the following reasons. The protein of meat is biologically complete, capable of satisfying the body's protein needs. The percentage of protein contained in meat makes it one of man's most important protein foods. And, all meat is highly digestible—96 to 98 per cent—an important consideration especially in the presence of disease.

The Seal of Acceptance denotes that the nutritional statements made in this advertisement are acceptable to the Council on Foods and Nutrition of the American Medical Association.

**"I'M SO GLAD DOCTOR
PRESCRIBED BAKER'S
MODIFIED MILK"**

POWDER OR LIQUID

A Highly Nutritious Food for Infants...

from birth throughout the bottle feeding period

- *Baker's Modified Milk is a food for infants that may be used either entirely in place of mother's milk or complementary to breast feeding . . .*
- *A food that is well tolerated by both premature and full-term infants . . .*
- *A food that does not require complicated directions and is easily prepared for feeding . . .*
- *A food that is advertised only to the medical profession.*

THESE are reasons why Baker's Modified Milk is so steadily gaining wide prescription.

Applicable to practically all infant feeding cases during the entire bottle-feeding period, Baker's is a time-saver for today's busy physician. And mothers like to feed Baker's because it is convenient and economical to use. With Baker's there's little chance for error, for there's

only one thing to do—dilute to prescribed strength with water, previously boiled.

The mother enjoys a well-nourished and happy baby, because Baker's is well-supplied with the nutritive elements for normal growth and fortified with seven dietary essentials, including liberal protein content (60% more than human milk). Write for samples and complete information.

Baker's Modified Milk is made from tuberculin-tested cows' milk in which most of the fat has been replaced by animal and vegetable oils with the addition of lactose, dextrose, gelatin, iron ammonium citrate, vitamins A, B₁ and D. Not less than 400 units of vitamin D per quart.

"Complete parenteral feeding has the advantage of producing complete gastrointestinal rest, equal if not superior to that induced by morphine."³

Parenamine

PARENTERAL AMINO ACIDS STEARNS
FOR PROTEIN DEFICIENCY

PARENAMINE is a 15 per cent sterile solution of all the amino acids known to be essential for humans, derived by acid hydrolysis from casein and fortified with *dl*-tryptophane.

PARENTERALLY ADMINISTERED, Parenamine replenishes depleted protein reserves, compensates for the increased loss of nitrogen which accompanies surgical trauma,^{3, 4} restores and maintains positive nitrogen balance while resting the gastro-intestinal tract, prevents gastro-intestinal edema, enhances wound healing and shortens convalescence.

FOR USE alone or as a supplement to high protein diets and/or tube feedings to provide the nitrogen essential for normal cell function and tissue repair. *Particularly indicated* in pre- and postoperative management, gastro-intestinal obstruction, extensive burns, etc.

ADMINISTER diluted with three or four parts of 5 per cent dextrose or sterile, pyrogen-free distilled water, isotonic saline, or Ringer's solution.

SUPPLIED AS Solution 15% in 100 cc. rubber-capped bottles.

**NOW....
A Truly Modern
Home Cleaning
Appliance**

LEADING home economists have called Rexair, "The greatest advance in home cleaning methods in more than thirty years."

There is a reason for this enthusiasm. That reason is Rexair's entirely new cleaning principle.

To begin with, Rexair uses neither a bag nor a filter. Bags and filters depend for their operation on *porousness*. They must be porous to let the air escape; and when air escapes, small particles of dust escape with it. You take dust from the floor and actually blow it into the air you breathe.

Bags and filters also clog up, and then cleaning efficiency drops.

Rexair completely does away with bags, filters, screens, or anything else that depends on porousness for its operation. Instead Rexair—and *only* Rexair—uses a bath of pure water to catch and hold dust and dirt.

Wet dust cannot fly. A water bath cannot clog up. Learn more about Rexair today!

SEND FOR THIS FREE BOOK

The complete story of Rexair, told in colorful pictures and text. Shows how Rexair performs all home cleaning tasks and gives vitalizing freshness to the air you breathe.

AMERICAN
MEDICAL
ASSOCIATION
PUBLICATIONS

1 Precise Administration
2 Minimum Irritation
3 Complete Absorption
4 Sustained Action

For oral use 0.2 mg. tablets—vials of 30, bottles of 100 and 500; 0.1 mg. tablets—bottles of 100 and 500 • For intravenous injection: 1 cc. ampuls, 0.2 mg.

Purodigin has these advantages:

PRECISE DOSAGE: Purodigin (Digitoxin Wyeth) is absolutely uniform . . . standardized by weight, prescribed by weight.

LACK OF IRRITATION: Purodigin is concentrated—dosage is only *one thousandth* that of digitalis leaf. Nausea is rare.

ABSORPTION of Purodigin is virtually complete. Almost no irritating residue is left in the digestive tract.

SUSTAINED ACTION: Purodigin remains in the body as long as digitalis.

Try Purodigin—especially for those patients who do not easily tolerate digitalis leaf. Without interrupting treatment, simply prescribe 0.1-0.2 milligram Purodigin in place of 0.1-0.2 gram digitalis.

*"One
man's
meat . . ."*

Food allergy is a common but not easily diagnosed cause of digestive tract distress. If the offending food cannot be avoided, symptomatic relief of the spastic manifestations of proven or suspected gastrointestinal allergy — pylorospasm, spastic constipation, spastic colitis, etc.—may be obtained through the use of Mesopin.

Mesopin is a specialized antispasmodic whose action is predominantly directed toward the gastrointestinal tract. Its selective action permits more direct management of hyperactivity and spasticity without causing the undesirable and uncontrollable effects of atropine, belladonna, or related antispasmodics.

Mesopin is available on prescription in bottles of 100 tablets, each tablet containing 2.5 mg. (1/24 gr.) homatropine methyl bromide.

Literature on request.

Clinical studies concerned with the use of Glycerite of Hydrogen Peroxide in the treatment of chronic purulent otitis media demonstrated seventeen of twenty-nine patients in complete remission in 14 days and the remainder by the 38th day. The patients studied presented conditions existent for periods of 2 weeks to over 40 years. Previous treatment by the usual therapeutic means, including tyrothricin or penicillin, was ineffective in all cases.

Constituents:

Hydrogen Peroxide 1.446%, Urea (Carbamide) 2.554%, 8-Hydroxyquinoline 0.1%.
Dissolved and stabilized in substantially anhydrous glycerol... q.s. ad. 30cc.

Available on prescription in one-ounce bottle with dropper.
Administration: One-half dropperful two to four times daily.

“Beginner’s luck” isn’t always good

The good luck so often attributed to beginners can’t be counted on in infancy. Here the “beginners” often meet insurmountable obstacles which have raised the proportion of infant deaths within the first 30 days to 62.1% of the total infant mortality.* During this hazardous first month proper selection of the first formula is therefore of vital importance.

‘Dexin’ has proved an excellent “first carbohydrate” because of its high dextrin content. It (1) resists fermentation by the usual intestinal organisms; (2) tends to hold gas formation, distention and diarrhea to a minimum, and (3) promotes the formation of soft, flocculent, easily digested curds. ‘Dexin’ does make a difference.

*Vital Statistics—Special Reports: Vol. 25, No. 12, National Office of Vital Statistics, Washington, D. C. (Oct. 15) 1946, p. 206.

‘Dexin’ HIGH DEXTRIN CARBOHYDRATE BRAND

Remarkable results

in
dysmenorrhea

In a clinical study extending over a period of a year, Long* used Edrisal as the sole medication in treating 630 employees for dysmenorrhea. Results were dramatic. He concluded, "We use it [Edrisal] with the knowledge that nine out of ten sufferers will get the relief they seek."

Edrisal combines the recognized analgesics—acetylsalicylic acid and phenacetin—with the unique anti-depressant, Benzedrine Sulfate. Consequently, it not only relieves the pain during the menstrual period, but also combats the accompanying psychic depression.

Best results are usually obtained with a dosage of *two* tablets, repeated every three hours, if necessary.

*Long, C.-F., M.D.: Edrisal in the Management of Dysmenorrhea, *Indust. Med.* 15:679 (Dec.) 1946. *Indust. Nurs.* 5:23 (Dec.) 1946.

The First Modern Anatomy...

Medicine and Dentistry thank Belgium's Vesalius (1514-1564) for the first accurate knowledge of human anatomy. Galen's knowledge of monkeys, dogs and pigs had been gospel for 1,350 years. But what of the *human* body? Vesalius, who at 23 held Padua's first chair of anatomy, robbed scaffolds of charred criminals until he could name every human bone, even when blindfolded.

His great book (printed, like the Copernican theory, in 1543—11 years after Jordan's book on teeth and a year before Ryff's on the correct number of tooth roots) showed no vena cava arising from the liver, no imputrescible heart bone, no opening between the 2 ventricles, etc. He had brought honest *observation* to anatomy.

A doctor's responsibility was greater, too, after 1200 A.D. Under Europe's "modern" Roman Law, he was liable not only for intentional injury, but for use of less than "stand-ard" knowledge or skill.

Doctors Today avoid loss of reputation, time and money by securing the Medical Protective policy's *complete* protection, *preventive* counsel and *confidential* service.

TRIPLE TESTED

DOSAGE:

One cc daily is recommended for the treatment of B vitamin deficiencies. If indicated, larger doses may be given in acute cases. To relieve mild deficiencies, 1 cc two or three times a week should prove clinically satisfactory.

FORMULA:

Each 1 cc contains
 Thiamin Chloride (B₁), 100 mg.
 Riboflavin (B₂) 2 mg.
 Niacinamide 100 mg.
 Calcium Pantothenate, 10 mg.
 Pyridoxine (B₆) 5 mg.
 Choline 20 mg.
 Inositol 10 mg.
 (Benzyl Alcohol 2%,
 Chlorobutanol 0.5%
 as a preservative.)

Stayner B Complex (Injectable) is a well balanced high-potency therapeutic vitamin formula for convenient administration, either intravenously or intramuscularly.

Choline and Inositol are included in the formula to provide all known B complex factors. The addition of 2% Benzyl Alcohol, a mild local anesthetic, allows intramuscular administration with minimum discomfort to the patient.

To insure safety, this preparation is tested three ways: *chemically* for potency, *physiologically* for lack of toxicity, and *biologically* for lack of contamination.

Ask your druggist for Stayner B Complex Vitamins (Injectable) Formula No. 309. It is supplied in 15 cc rubber-diaphragm vials, providing flexibility of dosage with maximum protection and economy.

ETHICS

There can be no middle course between the ethics of the medical profession and the temptations of the market place in the field of anatomical supports. Here the standards of the businessman must be elevated to the standards of the doctor because the customer of the businessman is the patient of the doctor. Anything else is "merchandising quackery." We at Camp have for many decades controlled our distribution throughout the recognized retail institutions which like the doctor have earned the respect and confidence of their home communities. No appeal is used in our advertising approach to the consumer which fails to meet the precepts of the profession. We serve the physician and surgeon by living up to our chosen function of supplying scientific supports of the finest quality in full variety at prices based on intrinsic value. We try to insure the precise filling of prescriptions through the regular education and training of fitters. In cooperation with medical and educational public health authorities we play the role our resources permit in promoting better posture and body mechanics. That is our idea of the practical ethical standards which permit the businessman to solicit the recommendation of the doctor.

Camp Anatomical Supports have met the exacting test of the profession for four decades. Prescribed and recommended in many types for prenatal, postnatal, postoperative, pendulous abdomen, visceroptosis, nephroptosis, hernia, orthopedic and other conditions. If you do not have a copy of the Camp "Reference Book for Physicians and Surgeons", it will be sent upon request.

Replacing turmoil with serenity for women undergoing menopausal disturbances has become a matter of comparatively specific therapy.

Choice of an estrogenic product in this condition is likewise well charted. For optimum relief of symptoms, the competent physician selects a product whose manufacturing history he need never question.

This, perhaps, may account for the wide use of Solution of Estrogenic Substances, Dorsey. Made by Smith-Dorsey Company, whose plant facilities, personnel and procedure are above reproach, these products merit the continuing confidence of careful doctors.

No. 208 in the "See Your Doctor" series

. . . published in behalf of the medical profession

To an audience of over 23 million people, in LIFE and other national magazines, Parke-Davis presents the message shown below.

A reproduction in full color will be sent on request.
Write to Parke, Davis & Company,
Detroit 32, Michigan.

Some things you should know about your family doctor

No. 208 in a series of messages from Parke, Davis & Co.
on the importance of prompt and proper medical care.

If your family doctor were asked to value his own services, he would probably pass over the number of lives he saves in times of crisis. He would be likely to think first of the day-to-day help he gives to the hundreds of people who look to him as a medical advisor and friend.

For your family doctor—and every family doctor—is primarily concerned with people. He knows each of his patients as an individual human being, whose physical make-up and reactions, whose personal problems are never quite like anyone else's.

Following you through the years, he gains a unique understanding of you as a person.

He knows whether you have, normally, a fast pulse or a slow one; whether you run a high temperature on slight provocation, or only in serious illness.

He knows what strains your job places on you; what your past problems have been; what to look out for as a danger signal in the future.

This knowledge, which deepens every time he sees you, serves him well when you are ill. For he can judge the importance of your symptoms against the background of your individual history.

With this knowledge he can also help you avoid many kinds of illness. By detecting and taking care of minor ailments early, he can often keep them from becoming serious.

By his years of training and experience, and his continuing study of advances in medical science, and varied medical problems that arise in his daily practice.

Give him your complete confidence at all times and follow his recommendations.

Should he suggest a consultation with a fellow

physician, or advise you to go to the hospital, you can be sure that such advice is based on his broad general knowledge of medicine plus his familiarity with your particular case.

SEE YOUR DOCTOR. Make him a part of your family's life. His continuing supervision is your best

guarantee that your children will grow up well and strong, and that you will live a long and healthy life.

And through the years, turn to him whenever you are troubled by a problem concerning your health. His wisdom and friendly understanding make him the best counselor anyone could hope to find.

Experience is the Best Teacher

Theobald Smith

(1859-1934)

proved it in allergy

Smith discovered the phenomenon of sensitivity—animals injected with a foreign serum or protein often die or show severe symptoms after a second injection, even in minute quantities: Smith's conclusive research proving this phenomenon later led to the development of further studies of allergic reactions.

Yes, and experience is the best teacher in smoking too!

EXPERIENCE during the wartime cigarette shortage taught smokers the differences in cigarette quality. In those days, people smoked—and compared—many different brands. That's the experience from which so many smokers learned that Camels suit them best. As a result, more people are smoking Camels than ever before.

Try Camels! Let *your* taste and throat tell you why, with millions who have tried and compared, Camels are the choice of experience!

According to a Nationwide survey:

MORE DOCTORS SMOKE CAMELS

than any other cigarette

This Combination

CREAMY CONSISTENCY
and PALATABLE FLAVOR
assures ready acceptance

INFANTS quickly learn to discriminate between foods which they like and those they dislike. At first, physical consistency and later taste are the two criteria on which a solid food is appraised.

From this standpoint Malt-o-Meal—a farinaceous wheat cereal flavored with toasted malt—ranks high as a desirable cereal food for infants. It quickly cooks to creamy consistency, and is entirely devoid of grittiness to which the infant might object. Its delightful flavor

is appealing to infants and children. This combination—creamy consistency and palatable flavor—makes for ready acceptance.

Malt-o-Meal, in addition to the basic nutrients found in wheat, provides significant amounts of the B complex vitamins thiamine, riboflavin, and niacin, and makes an excellent contribution of iron. It is readily digested, is residue-free (fiber content 0.4%), and cannot overtax the digestive tract of infants.

CAMPBELL CEREAL COMPANY, Minneapolis, Minn.

Malt-o-Meal

Malt-o-Meal, an enriched wheat cereal flavored with toasted malt, provides per ounce (dry weight), 0.29 mg. of thiamine, 0.13 mg. of riboflavin, 1.09 mg. of niacin, and 2.00 mg. of iron. Thus Malt-o-Meal provides appreciably more thiamine, riboflavin, and iron than does whole wheat, and 78% of the niacin content of whole wheat.

nontoxic

smaller dosage

treatment of inflammatory enteric diseases

'SULFATHALIDINE' *phthalylsulfathiazole*, developed by the Medical Research Division of Sharp & Dohme for treatment of inflammatory conditions of the intestine, is clinically nontoxic and effective in *smaller dosage* . . . 0.05 gm. to 0.1 gm. per kilogram of body weight. • 'SULFATHALIDINE' *phthalylsulfathiazole* maintains a high bacteriostatic concentration in the gastrointestinal tract, markedly alters the bacterial flora, and profoundly reduces *Escherichia coli*, clostridia and related organisms. 'SULFATHALIDINE' *phthalylsulfathiazole* is effective even in the presence of a watery diarrhea. • Administered recently to 100 patients with inflammatory diseases of the intestine, 'SULFATHALIDINE' *phthalylsulfathiazole* was effective in the treatment of 90.* The clinician reported:

"It is my impression that *phthalylsulfathiazole* is less toxic and more bacteriostatic than any intestinal agent used previously and that, because it has these properties, smaller doses of the drug may be used to advantage."*

Indications: Ulcerative colitis, regional ileitis and ileojeunitis, and as an adjunct to intestinal surgery.

• Supplied in 0.5-Gm. compressed tablets, bottles of 100, 500 and 1,000. Sharp & Dohme, Philadelphia 1, Pa.

Better Living by Design

Borden's Nutritional Prescription Specialties

Better living... better development and well-being... require better nutrition. Borden's Prescription Products arm the physician with the solution to practically all infant and many adult feeding problems... effectively and dependably!

BIOLAC

A complete infant food—when ascorbic acid only is added—for optimum nutrition. Resembles human milk in nutritional values and ease of digestibility.

DRYCO

Ideal for formula flexibility in infant feeding, with high protein, low fat and intermediate carbohydrate content. May be used with or without added carbohydrate—quickly soluble in cold or warm water.

GERILAC

Powdered modified milk for special dietary uses—for well-rounded nutrition in convalescence and old age. Palatable and readily digestible—only water needed for dilution.

MULL-SOY

A hypoallergenic emulsified liquid soy food for patients allergic to milk, with nutritional factors approximating those in cow's milk. Dilute 1:1 with water.

BETA-LACTOSE

The natural carbohydrate of milk—five times more soluble than alpha lactose, and much more palatable! Excellent for formula modification for infants, and for corrective nutritional therapy in adults.

KLIME

Spray-dried whole milk with soft curd characteristics. Valuable in infant formulae, peptic ulcer and other special diets, and an ideal replacement for inadequate or unripe fresh milk.

The nutritional statements in this advertisement are acceptable to the Council on Foods and Nutrition of the A. M. A.

All drug stores carry Borden Prescription Specialties. Further data sent to physicians on request.

radiographic vs. surgical

Exploration

When confusing abdominal symptoms and signs create a diagnostic tangle or do not yield properly to medical management, *radiographic exploration* of the gallbladder with PRIODAX will often reduce the need for *surgical exploration*. PRIODAX cholecystography almost never fails to reveal disease of the gallbladder if it exists, or to produce unequivocally clear silhouettes if the organ is normal.

PRIODAX

(brand of iodoalphonic acid)

PRIODAX is rarely eliminated prematurely from the gastrointestinal tract. The opacities produced by it are homogeneous, sharp and unstratified. Moreover, clear visualization will not be obscured by contrast substance in the colon when PRIODAX is used. PRIODAX, therefore, provides maximum dependable concentration of the most desirable type for reliable interpretation.

PRIODAX Tablets, beta-(4-hydroxy-3,5-diiodophenyl)-alpha-phenyl-propionic acid, available as six 0.5 Gm. tablets in individual cellophane envelopes. Boxes of 1, 5, 25 and 100 envelopes.

Trade-Mark PRIODAX—Reg. U. S. Pat. Off.

50,000 Units each
Crystalline Penicillin G
Potassium Salt

SOLUBLE Tablets Crystalline Penicillin represent a signal advancement in penicillin therapy. Containing neither binder nor excipient, they provide 50,000 units of Crystalline Penicillin G Potassium per tablet. Dissolving rapidly in water, milk, syrups and saliva, they find application in pediatric prac-

tice, in aerosol therapy, and in sublingual administration. Heat stable, require no refrigeration. They permit large quantities of penicillin to be conveniently stored or carried without bulkiness in the emergency bag. Available through all pharmacies in boxes of 24, each tablet aluminum foil wrapped.

dyspepsia

the most common gastric disturbance

"Dyspepsia" due to hyperchlorhydria is the most common of all gastric disturbances. . . By prescribing Creamalin for the control of hyperacidity, the physician is assured of prolonged antacid action without the danger of alkalosis or acid rebound. Through the formation of a protective coating and a mild astringent effect, nonabsorbable Creamalin soothes the irritated gastric mucosa. Thus it rapidly relieves gastric pain and heartburn.

Ramses

PRESCRIPTION PACKET
NO. 501

1. Extensive clinical experience has established that the combined use of an occlusive diaphragm and a spermaticidal jelly affords the optimum in protection to the patient.

2. A comprehensive report shows an overwhelming preference for the diaphragm-jelly technique of conception control. In a survey comprising 36,955 cases, clinicians prescribed this method for 34,314 or 93 per cent.¹

3. Warner,² in a study of 500 cases in private practice, concludes that the combined technique is the most efficient

method; there was no case of unexplained failure.

4. For the optimum of protection and simplicity in use we suggest the "RAMSES" Prescription Packet NO. 501... a complete unit, containing a "RAMSES" Patented Flexible Cushioned Diaphragm of prescribed size, a "RAMSES" Diaphragm Introducer of corresponding size, and a large tube of "RAMSES" Vaginal Jelly. Available through all prescription pharmacies. Complete literature to physicians on request.
